

## Class 11: Technology as Progress

What are the two historical views of progress that Marx describes in his article?

1.

2.

What is different about the two time-periods/groups of people who define those views?

What does Marx urge us, as a society, to take away from his analysis?

For each of the views above, list two nanotechnology innovations that might contribute to "progress", as defined.

1.

2.

1.

2.

List three ways in which nanotechnology innovations might not necessarily contribute to progress.

1.

2.

3.

Is technology progress? Why or Why not?
